

Protonics Direct Sales to Physical Therapy Clinics

Protonics Neuromuscular Systems are now available for direct purchase by Physical Therapy Clinics for use within their Clinic as part of their in-clinic treatment programs. In addition, since the Systems are now owned by the Clinic, the Clinic can, if they so desire, send the Systems home with their patients as part of a home-use program.

Under the Direct Sales to Physical Therapy Clinics Program, Clinics can purchase Protonics Systems as follows:

- 1. Inverse will sell the Protonics Systems directly to Physical Therapy Clinics at a discounted promotional price of \$595.00 per system (list price: \$695) contingent upon an advance payment by the Clinic (check, credit card or COD) for the System.*
- 2. In addition, Physical Therapy Clinics can purchase systems from Inverse for resale or rental to their patients at a similar discounted price of \$595.00. This will allow clinics with DME billing capabilities to generate profits from the sale (list price - \$995) or rental (list price \$195/mo.) of the Protonics systems.*

As in the past, individual patients can still purchase or rent Protonics Systems directly from Inverse Technology Corporation for long-term home use if the Clinic does not have DME billing capabilities or does not wish to make direct sales to patients.
