

### **COVID-19 Safety Measures for Return to Live PRI Courses**

- Course attendees will be asked to stay home if they have had a fever or any respiratory symptoms within the past 3 days. In this event, the course tuition can be transferred to a home study or future live stream or live course date.
- Course attendees will have their body temperature checked each morning upon entry to the course. Individuals with a temperature greater than 100.4 will not be allowed to attend the course. If the individual would like to try and cool down for 5-10 minutes, they can have their temperature re-checked for entry.
- There will be only 2 participants sitting at each treatment/conference table, allowing individuals to maintain greater space. Individuals will also be asked to sit in the same seat on day 2 that they sat in on day 1.
- Tables will be spaced out further from each other to allow for greater social distancing.
- When course attendees sign in each day, they will be asked to use their own pen that they receive at their desk seat, so that people are not all touching the same pen.
- Course attendees will receive individual 2 oz. hand sanitizer bottles provided by PRI for their own use.
- The host site will have disinfectant wipes available for participants to use to wipe down their tables before/after lab, and the host site will wipe down all tables each morning and evening.
- Host site bathrooms will be required to have disposable paper towels.
- Continental breakfast will only have items that individuals can grab without needing to touch serving ware (i.e. bottled water, individual sized orange juice, la Croix, pop cans, individual yogurt cups, bananas, cutie oranges, pre-packaged packs of nuts/trail mix or popcorn, granola or fruit bars, etc.) and plastic utensils will be available. Coffee will still be available, but individuals will be encouraged to use a paper towel or Kleenex to touch the coffee dispenser.
- Course attendees will be required to wear a face mask at all times during the course. They will be allowed to go outside on breaks and remove their mask. Course attendees will be encouraged to bring their own face mask; however, the host site will be asked to have disposable masks onsite for anyone who may not bring a mask with them.
- The instructor will wear a face mask when directly interacting with course attendees (answering questions, walking around during breaks, demonstration or during lab sessions). The instructor will be able to remove their mask when they are lecturing at the front of the room, and will make sure to maintain 6 feet distance from the nearest table.
- During lab sessions, course attendees will not be required to participate in small break out groups if they are not comfortable doing so. In this case, if they would prefer to have the instructor demonstrate objective tests and/or manual techniques on them, the instructor can do so.
- PRI will discontinue the use of balloons with PRI Non-Manual Techniques during demonstration and lab sessions.
